

## Business services in the sector for Security services

### 0 Administrative Information about the Statistical Product

#### 0.1 Name

Business services in the sector for Security services

#### 0.2 Subject Area

Service sector

#### 0.3 Responsible Authority, Office, Person, etc.

Service sector.

Ludmila Glinska, tel. +45 39 17 38 81, e-mail: lgl@dst.dk.

#### 0.4 Purpose and History

The purpose of business services statistics is to provide new information about the activities in the service sector and thereby improve the knowledge of the information society. Moreover, the purpose is to improve the information in the national accounts statistics regarding the service sector, and finally it contributes to the continuing maintenance of activity codes in the Central Business Register. The survey was conducted for the first time for the year 2007 and the results were published in February 2009.

#### 0.5 Users and Application

Users of the statistics are politicians, organizations and private firms. The statistics can be used when planning and provide an overview of the development taking place in the service sector.

#### 0.6 Sources

The statistics are based on questionnaires. Plus turnover liable for VAT registered in the Central Business Register.

#### 0.7 Legal Authority to Collect Data

The Act on Statistics Denmark (Lov om Danmarks Statistik), Section 8, cf. Order no. 599 of 22 June 2000.

#### 0.8 Response burden

There has not been provided any test for this sector.

#### 0.9 EU Regulation

There has not been provided any test for this sector.

**Services:**

- Armoured car services
- Guard services
- Other security services
- Security systems services of electronic alarm systems with monitoring
- Security systems services of mechanical or electronic locking devices, safes and security vaults
- Investigation and detective services
- Other additional products n.e.c.

**Client:**

- Enterprises
- Public sector
- Households and non-profit institutions

Furthermore, information on ownership is collected ie. whether the ownership is Danish, intra-EU or extra-EU.

*Statistical aims.* In the publication the total turnover and exports of the activity codes are given in DKR millions and their distribution on products and services are given in per cent. Furthermore, the activity codes share of the turnover and exports of each products and services are given in per cent. Finally the share of total turnover of the different categories of clients is stated.

*Groupings.* In the publication the turnover is distributed by products and clients.

The activity codes are:

- Private security services (DB07) 80.10.00
- Security systems service activities (DB07) 80.20.00
- Investigation services (DB07) 80.30.00

Dansk Branchekode 2007 (DB07) correspond to Nace Rev. 2 activity classification

**2 Time****2.1 Reference Period**

The distribution of turnover and exports by products and services cover the financial year.

**2.2 Date of Publication**

The statistics are published every second year.

The time of publication, i.e. the time that passes between the end of the reference period and the time of publication in News from Statistics Denmark is approximately 330 days.

**2.3 Punctuality**

The statistics are usually published without delay in relation to the scheduled date.

**2.4 Frequency**

The statistic is published every second year.

**3 Accuracy****3.1 Overall accuracy**

The sample for the year 2007 consists of questionnaires from about 95 enterprises equal to a share of reply 95 per cent. The total turnover of these enterprises accounts for approximately 89 per cent of the total turnover of all enterprises engaged in sector for Security services in 2007 and 95 per cent of total fulltime employees. The sample consists of all enterprises with 5 or more employees.

The data from the questionnaires are grossed up to the provisional total turnover liable for VAT as it is registered in the Central Business Register. Consequently one should have reservations about the total turnover as the results are subject to some uncertainty.

### 3.2 Sources of inaccuracy

*Coverage.* In 2007, the sample covered approximately 89 per cent of the total turnover liable for VAT as it is registered in the Central Business Register.

*Selection.* In 2007, the sample consisted of about 95 enterprises, and all enterprises with 5 or more employees. Only enterprises which are active at the end of the year are included.

*Collection/measuring:* Data are collected by questionnaires. In the questionnaire the enterprises are asked to distribute their turnover in DKR 1,000 by a number of products, services and client categories.

*Loss.* In 2007, the loss amounted to 14 per cent, which is mainly due to enterprises being registered with an incorrect activity code and enterprises being closed down.

*Adaptation.* The information is grossed up to the total level of the six-digit activity codes within the strata mentioned above.

*Model assumptions:* No enterprises have been excluded from this investigation because of their number of employees or size of their turnover.

*Seasonally adjusted:* As the Business services statistics is a statistic that is performed once a year, there is no seasonally adjustment.

### 3.3 Measures on accuracy

The statistical uncertainty is not calculated.

[▲ Go to top of page](#)

## 4 Comparability

### 4.1 Comparability over Time

The survey was conducted for the first time in 2007.

### 4.2 Comparability with other Statistics

In the VAT statistics and in the enterprise statistics the turnover is published for the legal unit. The business services statistics is also published for the legal unit and the data is grossed up to the provisional turnover liable for VAT as it is registered in the Central Business Register. The final turnover is not available at the time when data is grossed up and therefore the turnover in the business services statistics is not exactly the same as the turnover in the VAT statistics and the enterprise statistics.

### 4.3 Coherence between provisional and final statistics

Only provisional turnover is published.

[▲ Go to top of page](#)

## 5 Accessibility

### 5.1 Forms of dissemination

The statistics are published in *News from Statistics Denmark*, *Statistical News Service sector*.

### 5.2 Basic material: Storage and usability

The questionnaires and data are stored for a number of years.

### 5.3 Documentation

The statistical methods are described in greater detail in *Statistical News Service Sector*.

### 5.4 Other Information

No other information is available
