# Necessary updates for the Microsoft RDP client

In some cases, it is necessary to update the client used to connect to your server in Statistics Denmark. This applies to Windows 7 PCs.
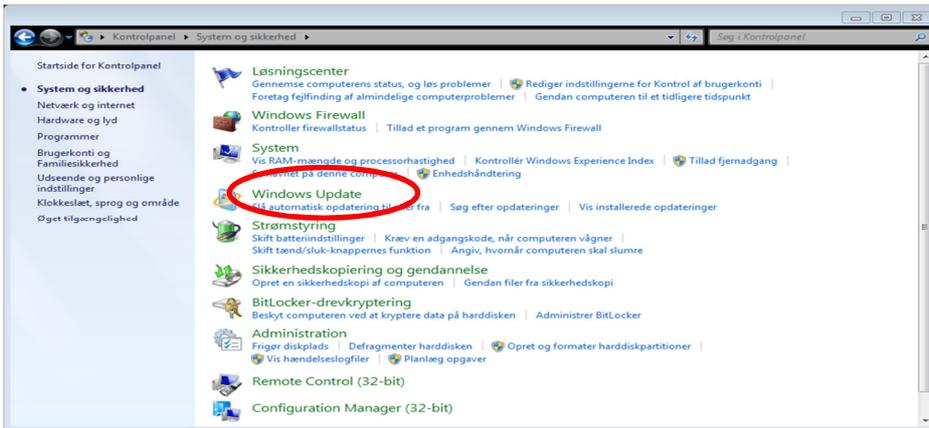

You do this by installing four updates via Windows Update

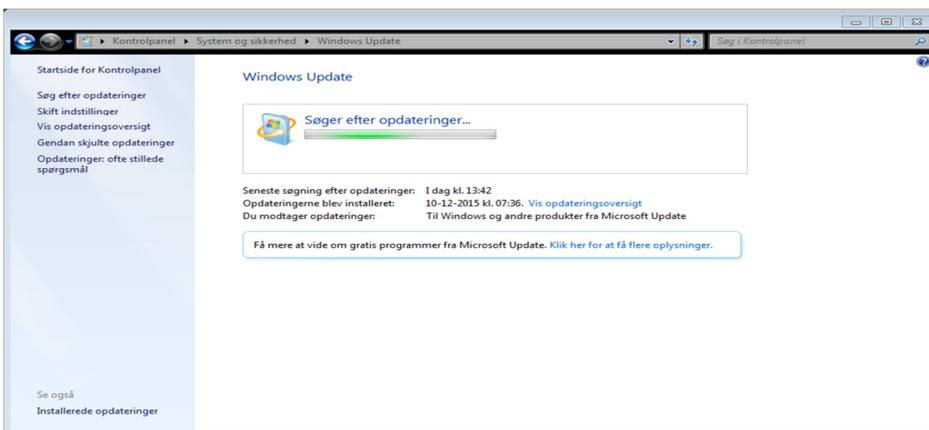

- Click the Start button and *Control Panel*

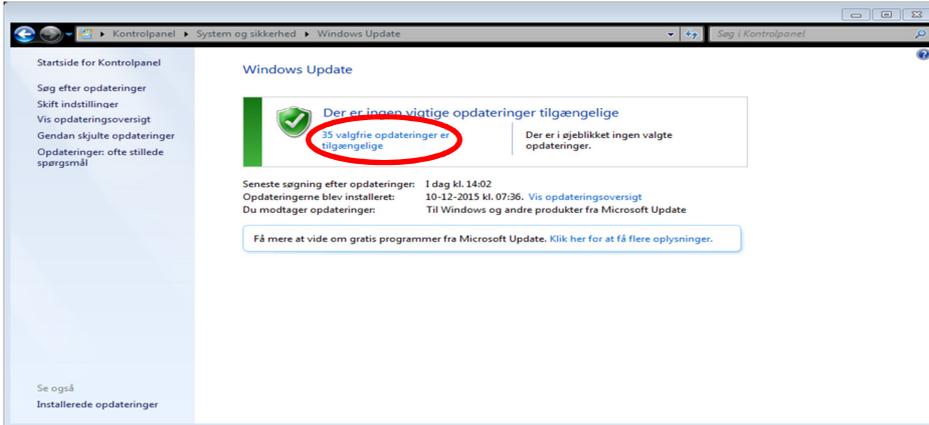

- Select *System and Security*
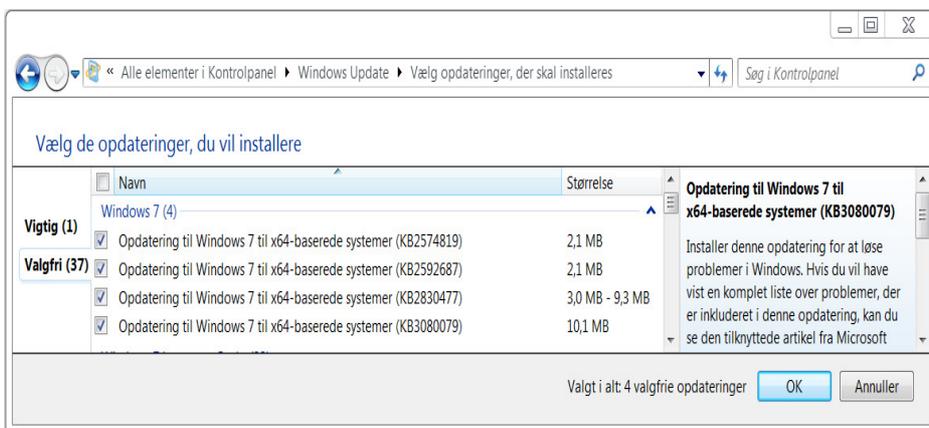

- Select *Windows Update*

Click *Search for updates*

Windows Update now looks for available updates

- Select *XX Optional updates are available*

In *Optional,* select the four optional updates pictured above, if they are available. If they are not in the list, you do not need to install further updates.

- Click *OK*

- Click *Install updates*

Now Windows Update will download and install the selected updates.

After completion, you must restart the PC.

- Click *Restart now*

Once the PC restarts, you can start the logon process.

For manual installation of needed updates:
